

---

**BUSINESS TECHNOLOGY**

# Technology that moves business forward.

Software, cloud and connected infrastructure. Built around the way your business works.

## 01 / THE CODEWAVE APPROACH

# Practical technology. Clearer operations.

Codewave brings software and IT services together around a simple question: what does your business need to do better?

From a new mobile app to the systems behind your workplace, we help turn requirements into a practical scope for implementation and support.

---

## Digital experiences

Websites, mobile apps and customer-facing platforms.

---

## Business applications

ERP, CRM and software for everyday operations.

---

## Cloud & platforms

Microsoft, AWS and cloud infrastructure solutions.

---

## Connected workplaces

IT networks, low-voltage systems and IP telephony.

---

## Security & support

Cybersecurity, CCTV and managed IT services.

---

## Industry solutions

Technology for property, F&B and event booking.

---

## Our partners

**02 / SOFTWARE & BUSINESS APPLICATIONS**

# Make your next idea work in the real world.

Connect customers, teams and processes with software designed around a clear business purpose.

**01 Web development**

Corporate websites, customer portals and web applications with purposeful design and maintainable foundations.

**02 Mobile app development**

Mobile experiences for your customers and teams, from the first concept through development and release planning.

**03 ERP & business systems**

Business applications and integrations shaped around your workflows, information and reporting requirements.

## DEVELOPMENT TECHNOLOGIES

ASP.NET / .NET

Flutter

React

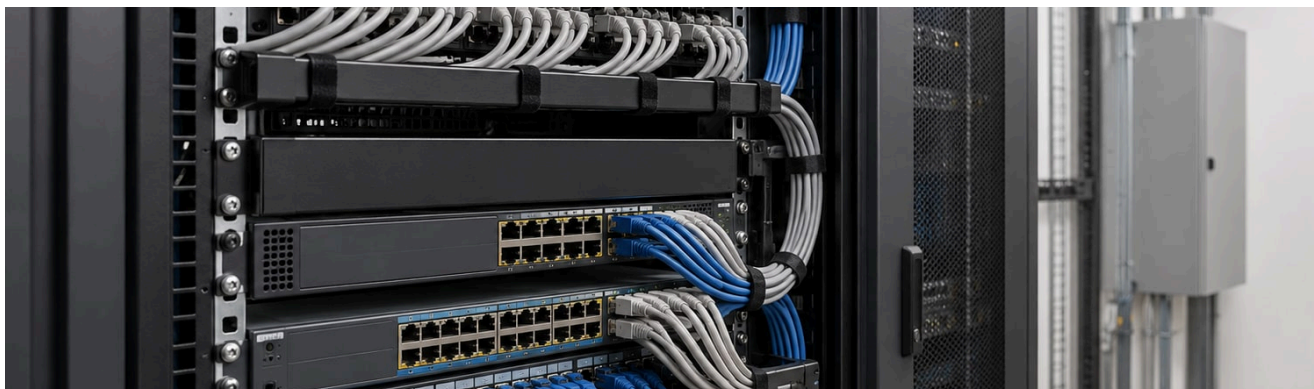

Microsoft SQL Server

PHP

**03 / CLOUD & INFRASTRUCTURE**

# Build the foundation for what comes next.

Plan the platforms, networks and systems your applications and people depend on.

**01**

## Microsoft solutions

Business productivity, Microsoft platforms and cloud services selected to suit your working environment.

**02**

## AWS & cloud solutions

Cloud planning, hosting and migration requirements with attention to security, operations and ongoing support.

**03**

## IT infrastructure

Servers, networks and workplace infrastructure aligned with your sites, users and applications.

**04**

## Managed IT services

Ongoing technical support and maintenance, with the service scope agreed around your business needs.

Platforms, infrastructure and support – considered together.

**04 / SECURITY & CONNECTIVITY**

# Protect your premises. Connect your people.

Bring physical security, digital protection and business communications into one coordinated technology plan.

---

**Cybersecurity**

Security requirements, access controls and protection for business systems.

---

**Low-voltage systems**

Structured cabling and connected building systems with a clearly defined scope.

---

**Call-center solutions**

Technology for organised customer conversations and contact-center operations.

---

**CCTV solutions**

Video-surveillance systems planned around your premises and operational needs.

---

**IP telephony**

IP-based business voice systems for connected teams and locations.

---

**Workplace connectivity**

Networks and the infrastructure behind reliable day-to-day communication.

## 05 / INDUSTRY SOLUTIONS

# Start with your industry. Shape the right solution.

Translate the way your organisation operates into practical software and infrastructure requirements.

## Real estate

Tenant and property management with Aqarent, alongside web, mobile and IT services for property businesses.

Discuss your portfolio and request a free Aqarent demo.

## Food & beverage

Digital and IT solutions for restaurants and F&B businesses, connecting customer-facing experiences with operational needs.

Define the processes, integrations and support your operation requires.

## 06 / CODEWAVE PRODUCTS

# Explore our products.

Select an app-store button, open a product page or send a demo request.

## Aqarent

Tenant & property management

A tenant and property management system. Explore the apps or request a free demo for your organisation.

## LET'S TALK

# Your next project starts with a conversation.

Tell us what you want to improve, what you use today and where you want to go.  
We'll help define a practical next step.

01

**Understand**

Discuss your needs and priorities.

02

**Define**

Agree scope and deliverables.

03

**Implement**

Build, configure and test.

04

**Support**

Plan handover and ongoing care.
